DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Van Erden (#,6,327,837). Van Erden shows advancing a first continuous strip 32 (fig 2) and attaching discrete sections of zipper profile 10 oriented in the machine direction at predetermined spaced intervals (fig 4).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3721

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Erden in view of Ouchi (#6,068,585). Van Erden substantially shows the claimed subject matter but does not show two webs and attaching means as claimed. Van Erden does not show two webs since web 32 is folded over former means 34 in a FFS operation. Ouchi discloses attaching strips 5, 6 simultaneously to advancing carrier webs 11, 16. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Van Erden with attaching means as taught by Ouchi to attach members to two carrier webs if no former means were utilized in a FFS operation.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
